

## WESTWAY FEED PRODUCTS LIQUID FEED RANGE

	Standard Molasses	Promol 20	Stockmol 40
DM %	75	72	65
Sugar %	46	38	32
Protein %	4	20	5
Energy Mj/Kg DM	12.7	12.3	12.5
Feeding rate (dairy/beef)	2-3Kgs	1-3Kgs	2-3Kgs
Feeding rate (young sock)	1-1.5Kgs	0.5-1Kgs	1-1.5Kgs
Feeding rate (sheep)	0.1-0.25Kgs	0.1-0.25Kgs	0.1-0.25Kgs

The Westway Liquid Feed Range of high dry matter, high sugar liquid feeds are formulated from a blend of molasses, liquid co-products and urea to supply an effective balance of fermentable energy and rumen degradable protein.

Using a Westway liquid feed helps to get the most from home grown feeds and the rest of the diet. The high protein options combine the fermentable energy of molasses with the cost effective protein source of ammonia.

Together, they supply a cost effective protein source as well as providing all the other benefits associated with feeding molasses. The Westway Liquid Feed range is suitable for all types of stock: Dairy, Beef and Sheep.

### The benefits of Westway Liquid Feeds:

- Stimulate Dry Matter intake
- Maximise fibre digestion
- Improve overall ration performance
- Reduce sorting
- Improve financial returns
- Cost effective high protein options available
- Proven to improve animal performance

All products in the Westway Feed Range are formulated to a declared analysis, are free flowing liquids, which are easy to handle liquids. These can be fed to all classes of ruminant livestock. The Westway Liquid Feed Range can be fed in a variety of ways from top dressing forage to feeding in a TMR.
